JNT-D-19-00190 Full Length Article
Exact Formulas for the Generalized Sum-of-Divisors Functions

The board has looked at your paper and we feel that while the results are interesting, they don't rise to the level of
JNT.

However, we have a computational section of the journal, and there is a chance that a new paper emphasizing some
of these aspects would be a good fit there. This is not a gaurentee, but if you are willing to rewrite parts of the paper
and emphasize the computational parts you mentioend....

I am copying the editor in charge of the computational section here; she and I are happy to talk to you further about
next steps if you elect to try a computational submission.
