Dear Professor Schmidt,

I am writing about the paper

Exact formulas for partial sums of the M\"obius function expressed by partial sums weighted by the Liouville lambda function
by Maxie D. Schmidt.

Thank you for your interest in submitting your paper to Acta Arithmetica. Unfortunately the editorial board of Acta Arithmetica cannot accept your paper for publication.

During the last year our journal received more manuscripts than can possibly be accepted, which temporarily caused a considerable backlog. As a result, our editors need to be very selective. I regret to inform you that your paper has to be rejected without refereeing.

We are sorry about this situation and we hope for your understanding. We wish you success in publishing your paper in another journal.

Yours sincerely,

Maciej Radziejewski
secretary of Acta Arithmetica
